Introduction

The Blockum DAO is a Decentralized Autonomous Organization that seeks to foster the growth of startups and promising business opportunities (PBOs) through a partnership with GoldOfir, an innovative company that developed the Foment GOL Token (FGOL). Blockum DAO aims to create a decentralized and collaborative ecosystem in which the community actively participates in the analysis and selection of the best startups and PBOs for investment.

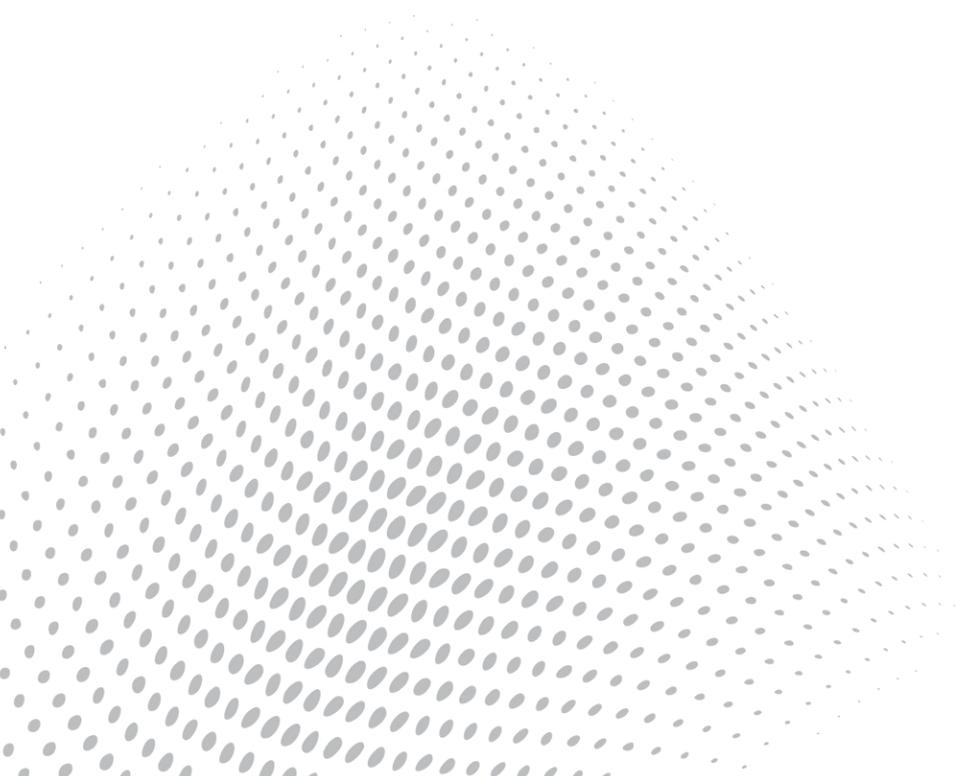

Glossary of Terms

- Blockum DAO: Decentralized Autonomous Organization that collaborates with GoldOfir in the analysis and selection of startups and PBOs for investment.
- Gold Ofir: Company that provides the Foment GOL Token (FGOL) for contributions to startups and promising business opportunities (PBOs).
- FGOL (Foment GOL): Foment Token used by GoldOfir to invest in startups and PBOs.
- Startups: Young and innovative companies that seek to develop and scale new solutions in the market.
- Promising Business Opportunities (PBOs): Projects or companies with potential for growth and success in the market.
- LP Tokens (Liquidity Provider Tokens): Tokens issued by a decentralized exchange, such as SushiSwap, that represent the user's participation in the liquidity pool.
- Blockum Pool: Liquidity pool created on SushiSwap, composed of 50% FGOL tokens and 50% WETH.

Glossary of Terms

- **HODL:** A popular term in the world of cryptocurrencies, originated from a typo of "hold" in a Bitcoin discussion forum. HODL refers to the practice of holding and not selling cryptocurrencies, even in times of price volatility, with the expectation that their value will increase in the long term. This strategy is based on the idea that the adoption and development of cryptocurrencies and blockchain technology will bring significant returns in the future.
- **Smart Contract:** Autonomous and programmable contract that facilitates the execution of transactions and activities on a blockchain platform.
- **ERC20:** Technical standard used for the creation of tokens on the Ethereum blockchain and other EVM networks.
- **NFT:** Unique token that represents a specific asset on the blockchain, used to authenticate the ownership of digital items.

The History of Blockum DAO

The story of Blockum DAO begins with a common need: the pursuit of financial security and freedom in an increasingly digital world. People around the world, big and small investors, were looking for ways to build a digital passive wealth, but faced significant barriers. Blockchain technology and decentralized finance (DeFi) promised to revolutionize the world of investments, but were complex and inaccessible to many. In addition, the market lacked liquidity and security was a constant concern.

It was in this context that Blockum DAO was born. A group of visionaries recognized the potential of blockchain and DeFi to democratize investment and decided to create a platform that would make these technologies accessible to everyone. They envisioned a universe where anyone, regardless of their experience or resources, could invest in promising startups and businesses around the world.

Blockum DAO was built on principles of transparency, inclusion, and collaboration. It was designed to allow its members, known as "Blockumers", to pool their resources to bid for investments that would normally be out of their reach. By pooling their resources, Blockumers could compete with large investors and participate in lucrative investment opportunities.

The History of Blockum DAO

However, the creation of Blockum DAO was not without its challenges. Blockchain technology and DeFi were new and complex, and many Blockumers struggled to understand and navigate this new universe. In addition, security was a constant concern, with the risk of hacks and fraud always present.

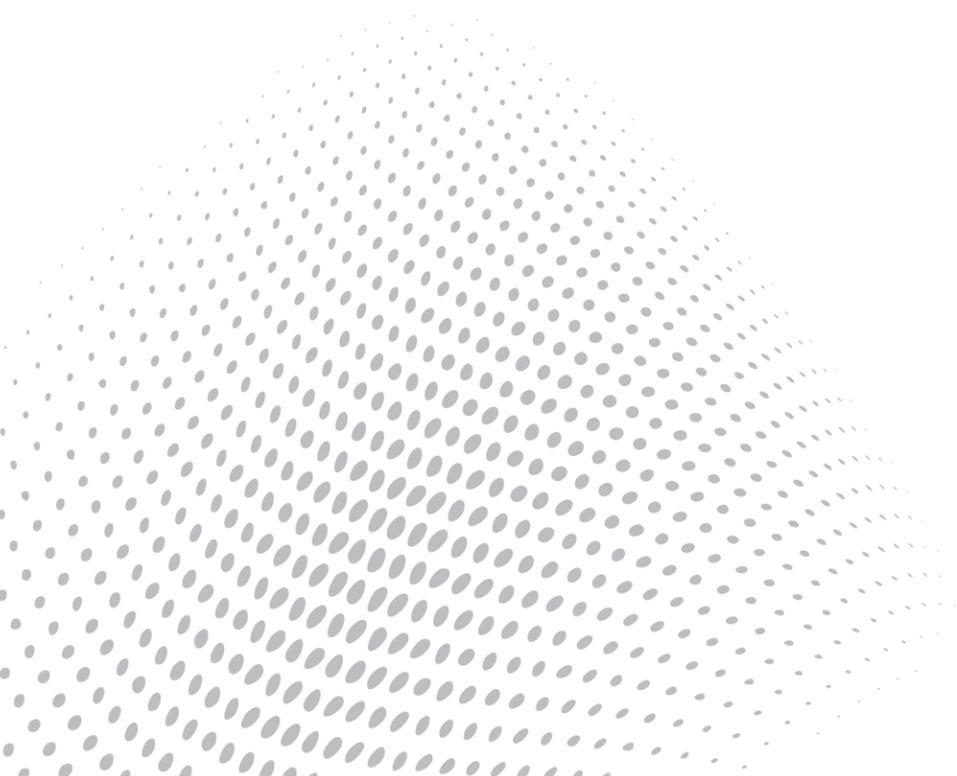

That's when the Foment Gol token came into play. This token was designed to bring liquidity and security to the Blockum universe. It allowed Blockumers to invest with confidence, knowing that their investments were secure. Foment Gol brought a new level of accessibility to DeFi, making it easier to understand and use.

Today, Blockum DAO is a thriving ecosystem of investors and entrepreneurs. Anyone can become a Blockumer and participate in this expanding universe. By participate in Blockum DAO, Blockumers are not only building a digital passive wealth, but they are also contributing to the growth of promising startups and businesses around the world. They are helping to shape the future of digital investment and bring the promise of blockchain and DeFi to everyone.

The Strategic Alliance: Blockum DAO and GoldOfir

The collaboration between Blockum DAO and GoldOfir combines the collective wisdom and decentralized governance of Blockum DAO with the financial and strategic knowledge of GoldOfir. This partnership ensures that only the best proposals from startups and PBOs are selected and supported, resulting in higher chances of success and return for investors.

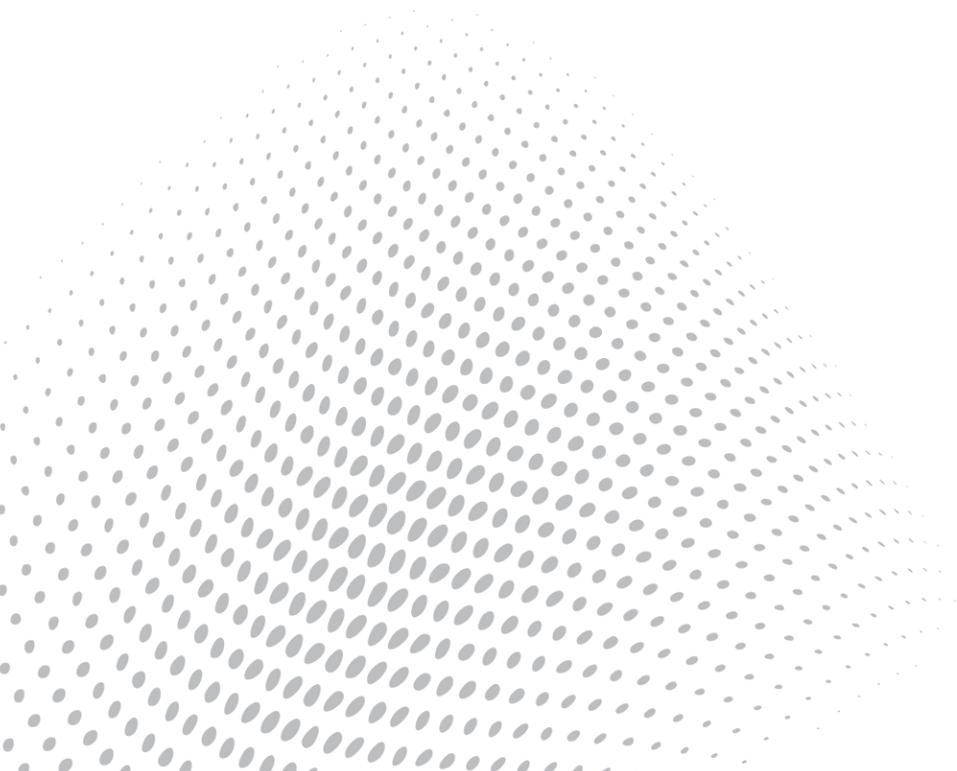

Competitive Advantages: The Differentiator of Blockum DAO's Business Model

Blockum DAO offers several competitive advantages for startups and investors:

- Rigorous analysis and selection: The partnership with GoldOfir enables a detailed and rigorous selection process, identifying companies with high potential for growth and success.
- Recurring return and profit distribution: Investors and participants in the Blockum DAO community benefit from a recurring distribution of up to 45% of the agreed percentage of profits generated by the supported startups and PBOs.
- Transparent and participatory governance: The involvement of the Blockum DAO community in the decision-making process and voting on proposals ensures an open and democratic governance environment.
- Forced HODL: By allocating LP tokens in the Blockum pool, users secure their share of the profits and benefit from HODL of two rising assets.
- Proposal launch open to all: Any member of the Blockum DAO community can create and launch a funding proposal for their startup or PBO, and it is up to the community to support or not support the proposal.

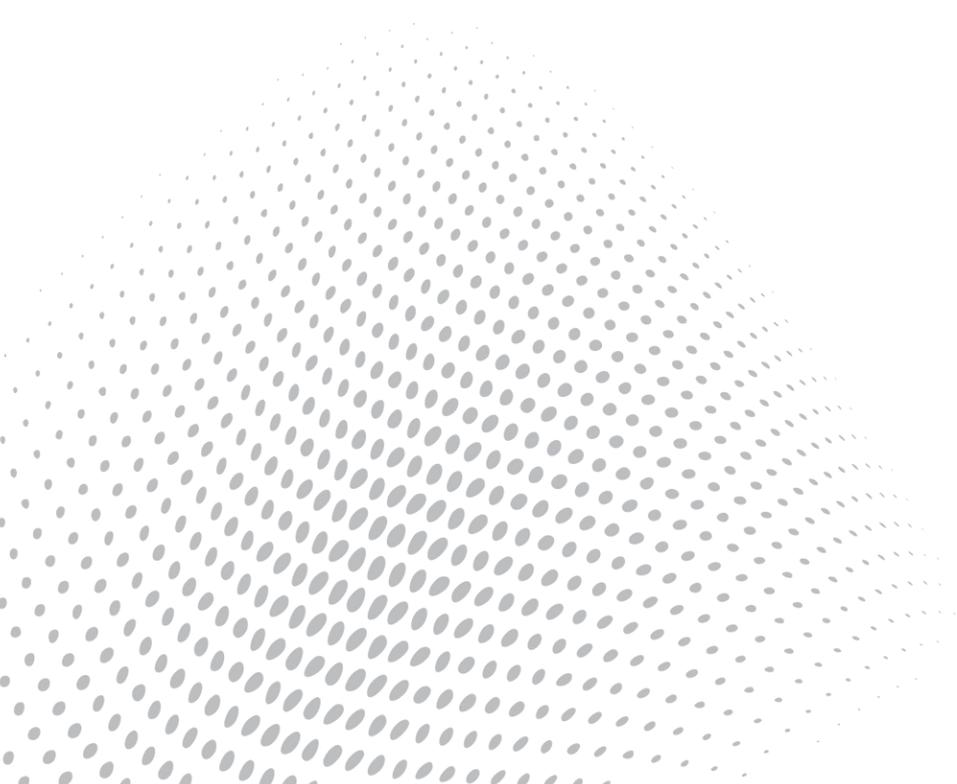

Connecting Startups and Investors: The Role of the FGOL Token

The FGOL token is the central element that connects startups, investors, and the Blockum DAO community. By investing in FGOL, investors and startups have the opportunity to participate in a dynamic and promising ecosystem, driving the growth and success of the supported companies.

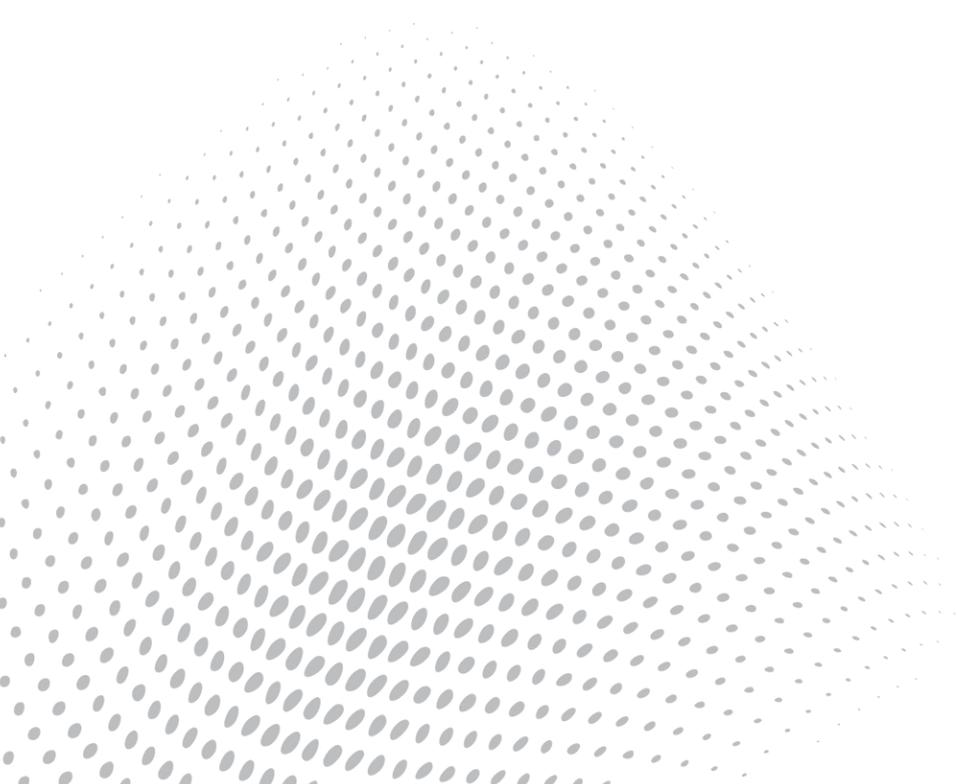

Governance and Transparency: The Decision-Making Process at Blockum DAO

Blockum DAO adopts a transparent decision-making process based on community participation. All members of Blockum DAO have the right to vote on the proposals presented, ensuring a democratic and inclusive process. This approach ensures that the best investment opportunities are selected, benefiting both startups and investors.

Security and Reliability: The Blockum DAO Smart Contract

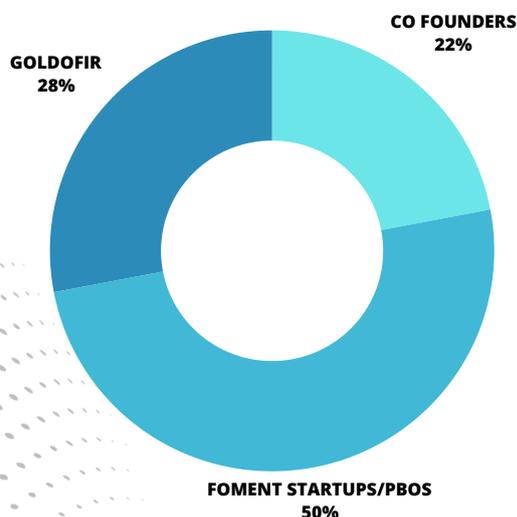

Blockum DAO and GoldOfir prioritize security and reliability in all transactions and interactions within the ecosystem. The Blockum DAO smart contract uses the OpenZeppelin library, ensuring the implementation of ERC20 standards and secure and robust access control.

Distribution and Allocation of FGOL Tokens

GoldOfir generated a total of 1 billion FGOL tokens, with the following distribution and allocation for the Blockum DAO ecosystem:

- 220 million FGOL tokens (22%) are owned by GoldOfir's 350+ co-founders. This initial allocation allowed the financing of the company's initial operations and the development of the ecosystem.
- 500 million FGOL tokens (50%) are reserved for fostering startups and PBOs. These tokens will be used to invest in promising companies, ensuring the growth and success of the ecosystem.
- 280 million FGOL tokens (28%) will be used for the maintenance and development of Blockum DAO and GoldOfir. This allocation will ensure the sustainability and continuity of the companies' operations.

Participating in Blockum DAO: How to Allocate LP Tokens in Blockum DAO

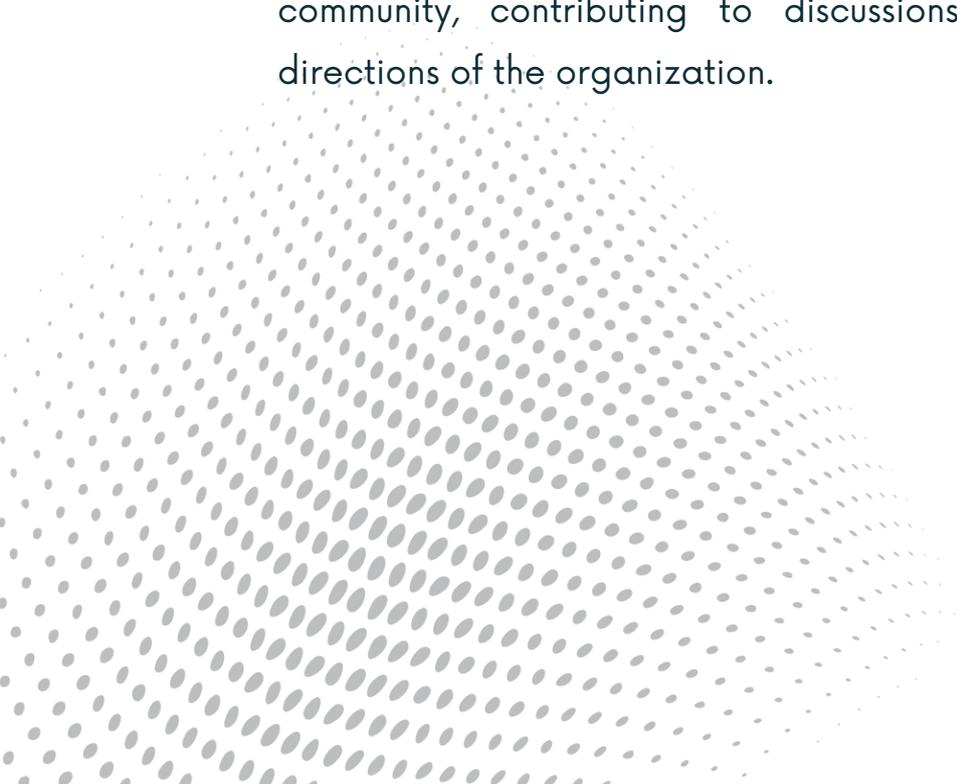

To become part of Blockum DAO and access the benefits offered, users should follow the steps below:

- **Convert Capital into Tokens:** The first step to being part of the Blockum DAO is to convert your capital into an equal proportion of Wrapped Ethereum (WETH - Address at Polygon Network - 0x7ceB23fD6bC0adD59E62ac25578270cFf1b9f619) and the GoldOfir Promotion Token (FGOL). This 50/50 split is required for allocation to the Blockum pool on SushiSwap.
- **Allocation to Blockum Pool:** After converting capital into WETH and FGOL, you must allocate these assets to the Blockum pool on the SushiSwap decentralized exchange platform. By providing liquidity to this pool, the investor receives LP (Liquidity Provider) Tokens in return.
- **Allocation of LP Tokens in Blockum DAO:** Once in possession of the Blockum pool's LP Tokens, the investor must then allocate them in the Blockum DAO smart contract. This allocation process is subject to a lock-up period, during which the LP Tokens are locked in the contract. This mechanism promotes the stability of the pool's liquidity and encourages long-term participation in the community.

Participating in Blockum DAO: How to Allocate LP Tokens in Blockum DAO

The benefits of allocating LP Tokens in Blockum DAO are multiple:

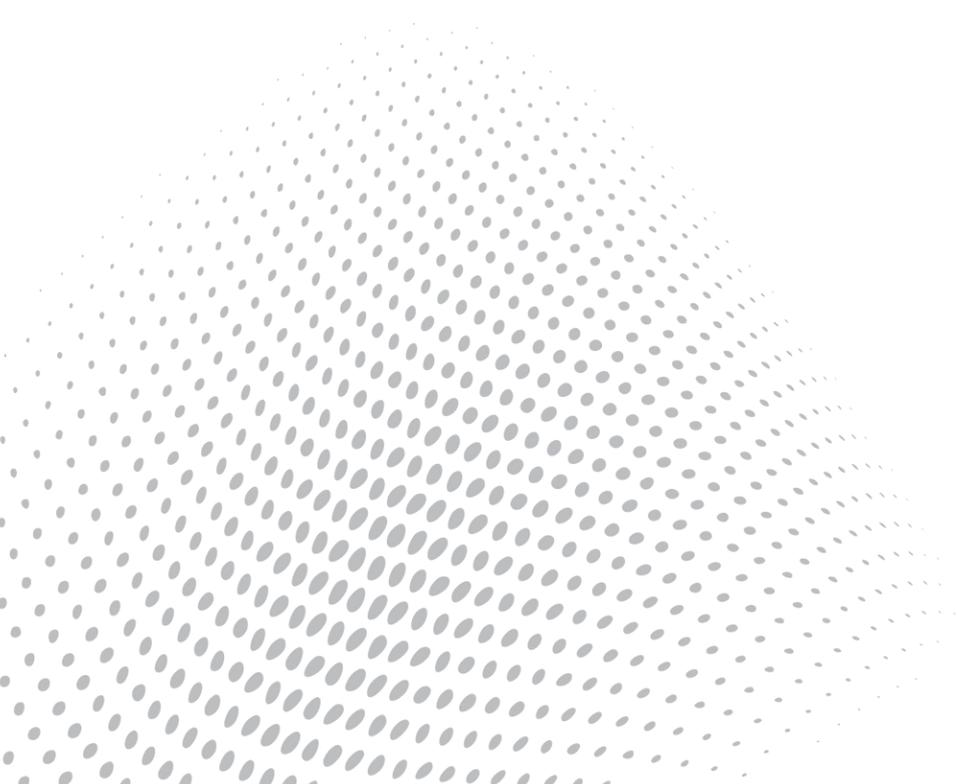

- **Voting Rights:** By allocating LP Tokens in Blockum DAO, the investor gains voting rights in community decisions. This includes the selection of startups and PBOs to receive investment, as well as any changes in DAO rules.
- **Profit Participation:** A significant portion of the profits generated by the startups and PBOs supported by Blockum DAO is distributed among community participants. Thus, by allocating LP Tokens, the investor acquires the right to a share of these profits.
- **Community Participation:** Allocating LP Tokens in Blockum DAO allows the investor to become an active member of the community, contributing to discussions, decisions, and future directions of the organization.

Participating in Blockum DAO: How to Allocate LP Tokens in Blockum DAO

- HODL Benefit: By holding and allocating LP Tokens, the investor benefits from HODL of two rising assets - FGOL and WETH. This can lead to a significant increase in the value of the investment over time, as these assets appreciate.

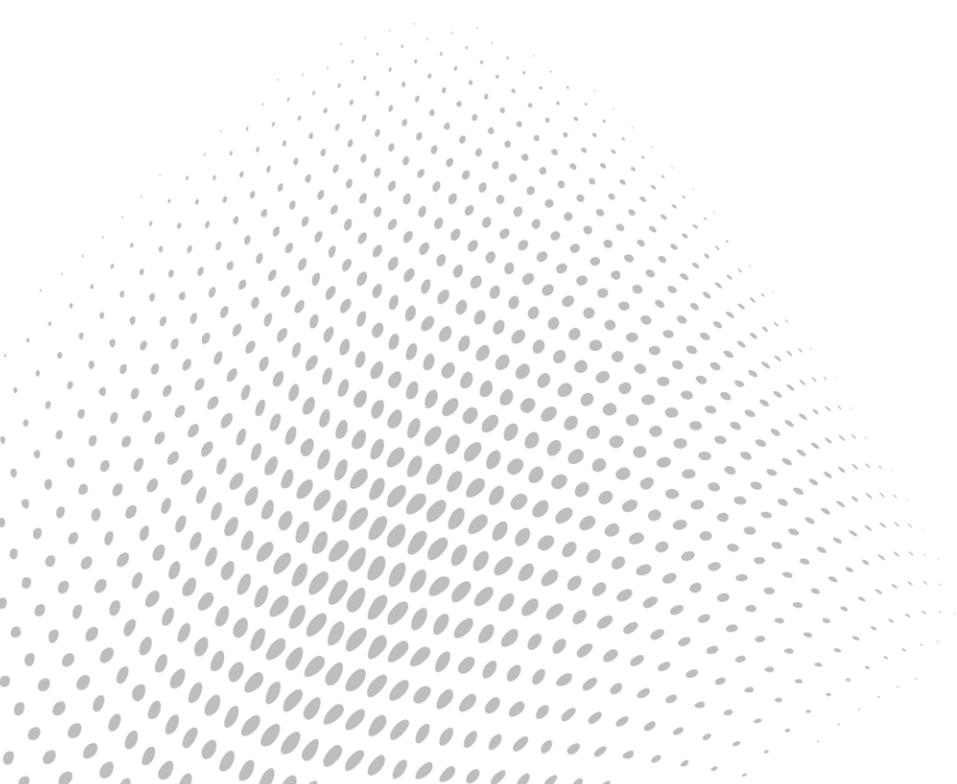

By following these steps, any investor can become an active member of Blockum DAO, directly participating in the growth and success of the supported startups and PBOs, as well as sharing in the profits generated by these companies.

Possibility of Additional Issuance of FGOL Tokens

Should there be a need for more resources in the future to foster startups and PBOs or for the maintenance of Blockum DAO and GoldOfir, there is the possibility of issuing an additional amount of FGOL tokens. This additional issuance will be subject to the approval of the Blockum DAO community and the terms set by the smart contract.

In this way, the Blockum DAO and GoldOfir ecosystem remains flexible and adaptable to future needs, ensuring the ability to continue supporting promising startups and PBOs, as well as ensuring the sustainability of the entire ecosystem in the long term.

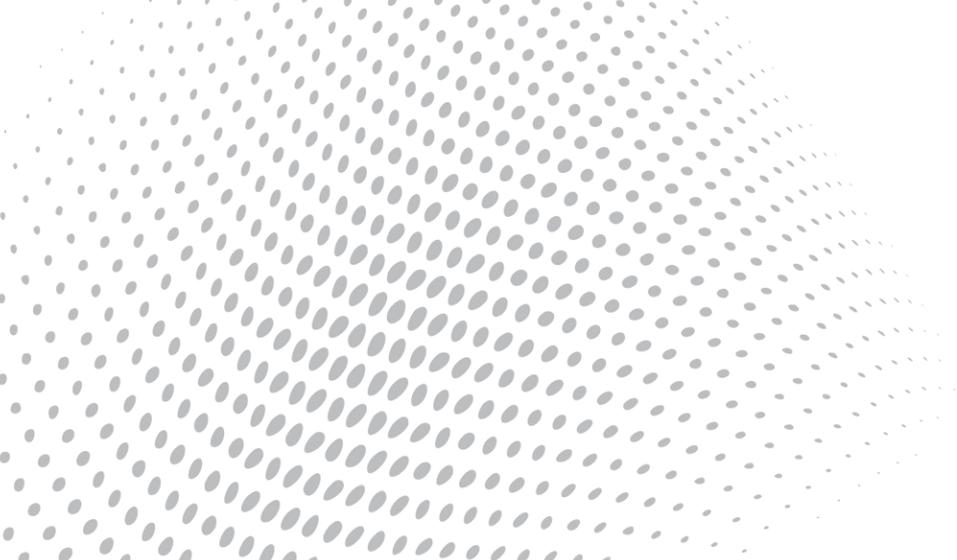

The Opportunity to Invest in the Future

The proposal from Blockum DAO and GoldOfir represents a unique opportunity for investors, startups, and members of the Blockum DAO community to participate in an innovative and promising ecosystem. By investing in the FGOL token, all involved have the chance to collaborate in the development and growth of companies with high potential for success.

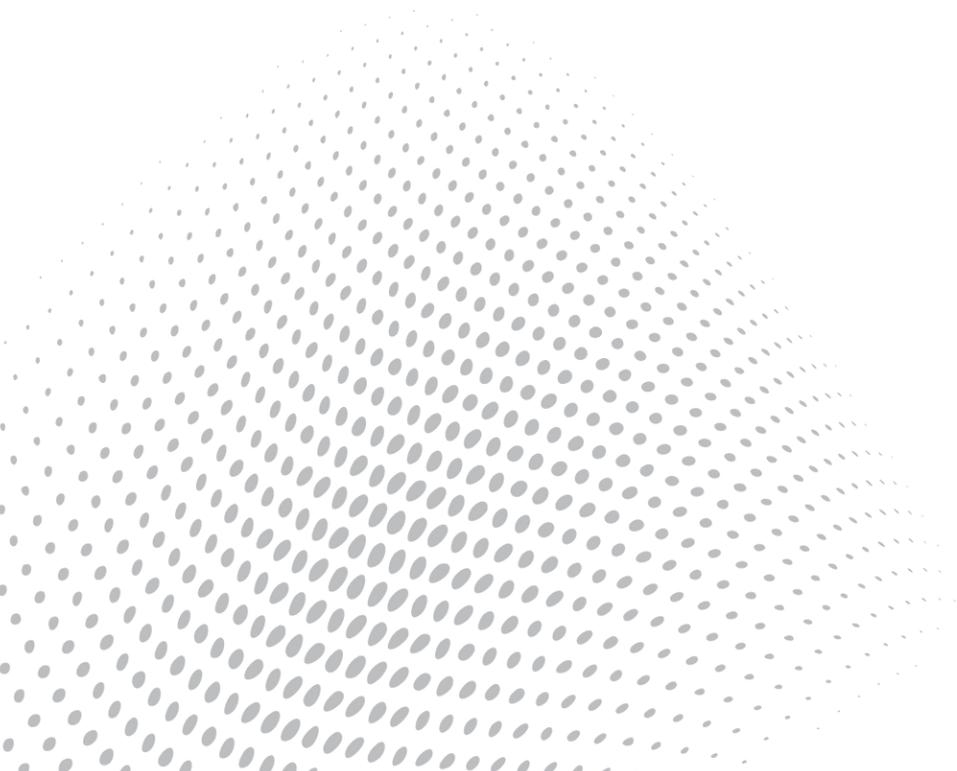

The rigorous analysis and selection process, provided by the collaboration between Blockum DAO and GoldOfir, ensures greater security and reliability in the investments made. The recurring distribution of profits and transparent and participatory governance offer important competitive advantages for participants in this ecosystem.

With the use of the Blockum DAO smart contract, GoldOfir ensures that transactions and interactions within the ecosystem are secure and reliable, providing a conducive environment for the growth and success of the supported startups and PBOs.

The Opportunity to Invest in the Future

By investing in the FGOL token and becoming part of the Blockum DAO community, you are not only supporting a future filled with innovation and success, but also generating significant returns and contributing to the growth of promising companies worldwide. This is your chance to invest in the future and be part of the global entrepreneurship revolution. Don't miss this opportunity!

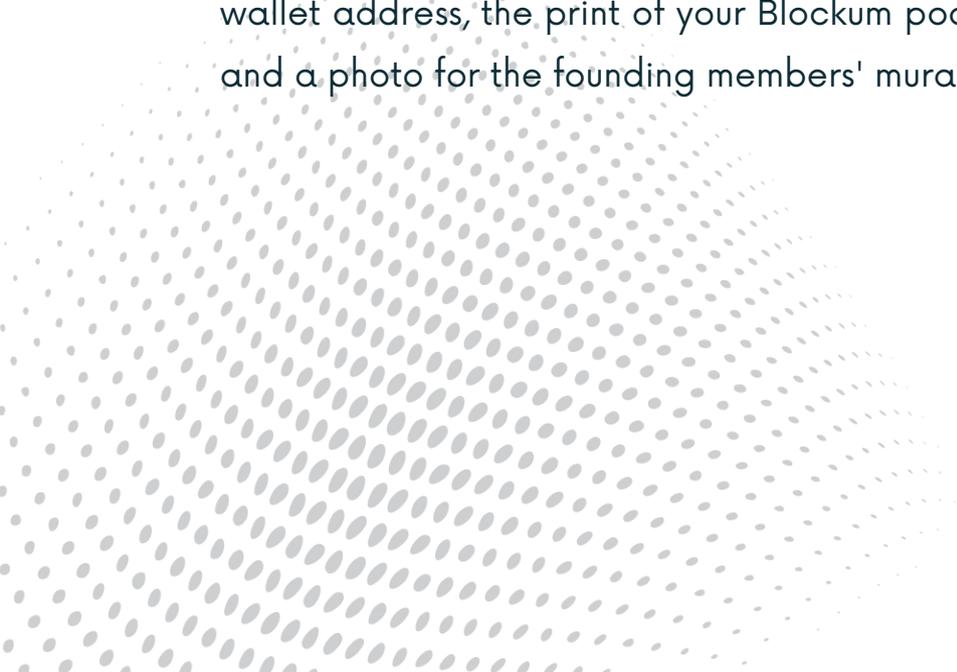

Founding Members Club

The Blockum DAO has created a Founding Members Club, which will bring numerous advantages to the participant, according to the NFT acquired.

Free NFTs will be distributed in 3 initial stages. Each NFT is unique and has a degree of rarity, according to the stage it was distributed, the value allocated in the Blockum liquidity pool, the territory, and its numerical sequence.

The benefits and advantages range from global recognition on Blockum DAO platforms, awards and gifts, to free passage at events made or sponsored by Blockum DAO and GoldOfir around the world, among other exclusive advantages, in addition to enabling the invitation to participate in the Blockum DAO advisory board.

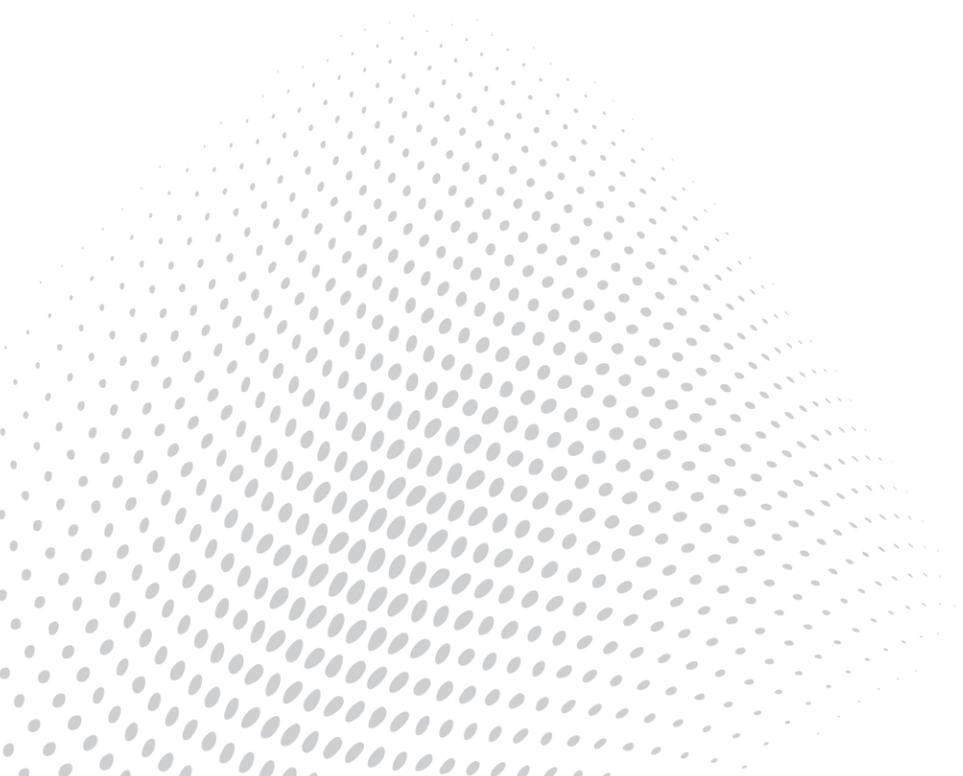

To withdraw your NFT, simply allocate your assets in the Blockum pool according to the values in the following tables and then allocate your LPs in the Blockum DAO smart contract. After doing this, contact Blockum DAO support at support@blockumdao.org, sending your wallet address, the print of your Blockum pool position, your full name, and a photo for the founding members' mural.

Founding Members Club

The first to request their NFTs will receive them, until the quantities of each stage and value range of their passive wealth in the Blockum pool are exhausted. Once in possession of their NFTs in their wallets, they can benefit from the advantages or trade them freely. Remember that only the holder of the NFT is considered a Founding Member and an integral part of the club, so when you sell it, you sell the right to your position in the roll of founding members.

The start or end of a distribution stage can be postponed or delayed, as needed and decided by the Blockum DAO Advisory Council.

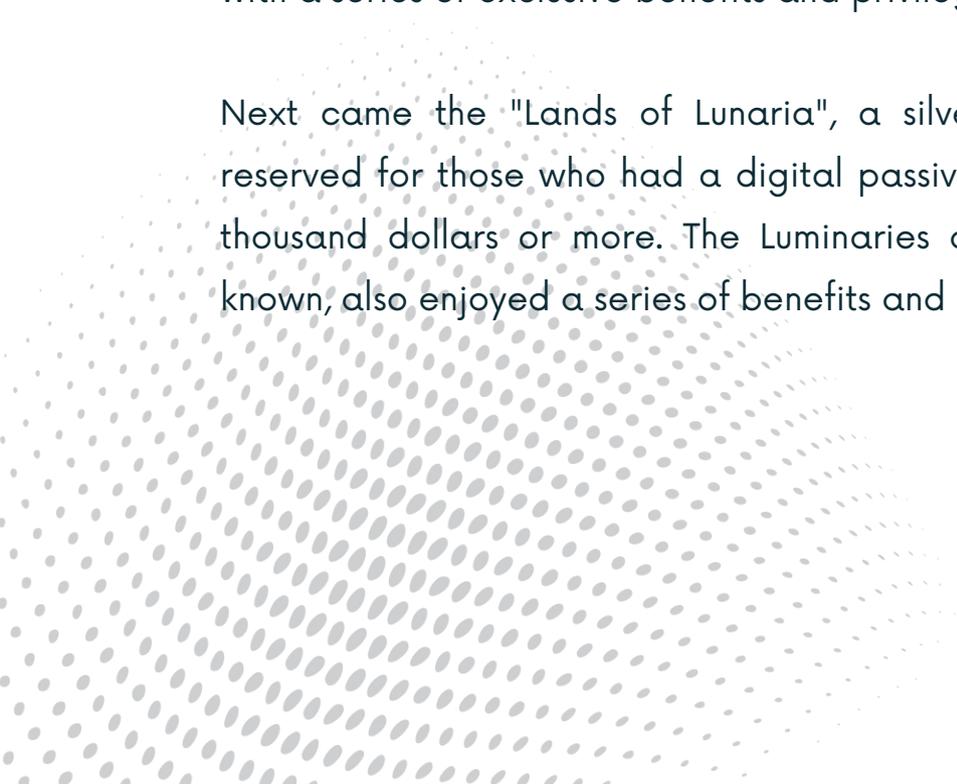

The Territories of the Blockum DAO Universe

As the Blockum DAO community grew and prospered, it became clear that a system was needed to organize and reward members according to their level of investment and involvement. Thus, the territories were born.

The territories were conceived as a physical representation of the Blockum DAO universe in the metaverse. Each territory represented a level of investment and offered corresponding benefits. Members could "claim" a territory by purchasing a corresponding NFT, which served as a kind of "passport" to that territory.

The first territory to be established was the "Kingdom of Solarius", a place of unparalleled light and power. This territory was reserved for members who had built the largest digital passive wealth in the Blockum DAO, those who had a wealth of one million dollars or more. They were known as the Sovereigns of Solarius and were rewarded with a series of exclusive benefits and privileges.

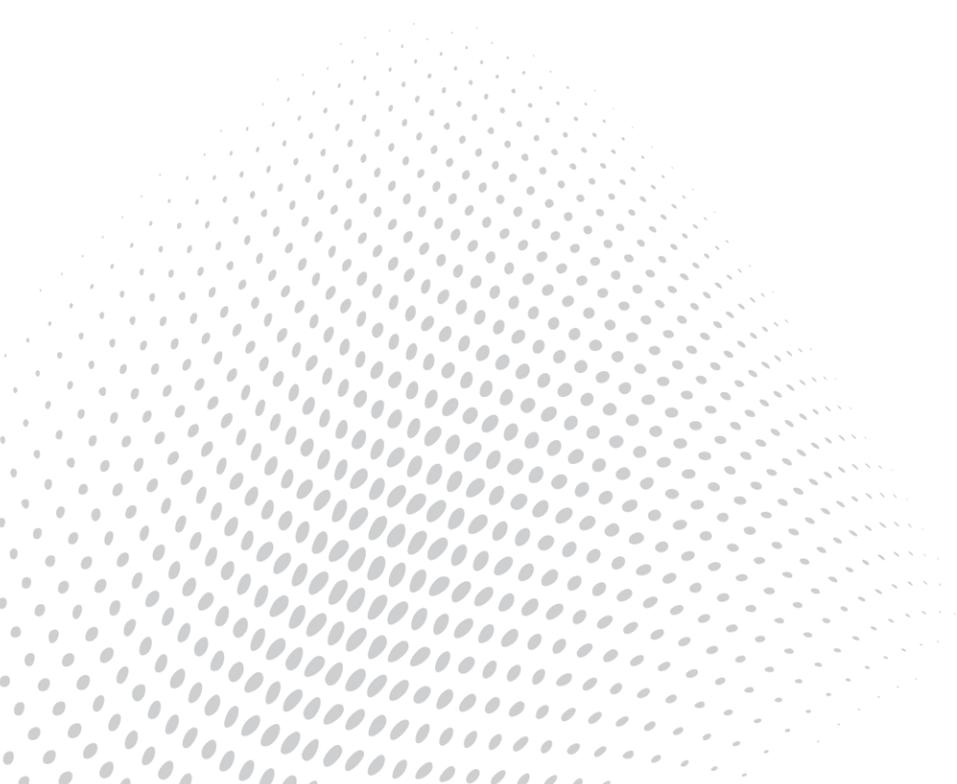

Next came the "Lands of Lunaria", a silver reflection of Solarius, reserved for those who had a digital passive wealth of one hundred thousand dollars or more. The Luminaries of Lunaria, as they were known, also enjoyed a series of benefits and privileges.

The Territories of the Blockum DAO Universe

The "Domain of Stellaris" was established for those who had built a digital passive wealth of ten thousand dollars or more, while the "Borders of Nebula" were created for those who had built a wealth of one thousand dollars or more. Each of these territories had its own culture and identity, and their members - the Astronomers of Stellaris and the Navigators of Nebula - enjoyed their own benefits and privileges.

The territories were not just a way to organize the Blockum DAO community, but also a way to create a sense of belonging and identity. Each member had a place in the Blockum DAO universe, a territory to call their own. And each territory was a vital part of the whole, contributing to the growth and success of the Blockum DAO.

The Territories of the Blockum DAO Universe

The distribution will take place in 3 stages, check below how they will be:

Pre-Distribution - 2024

TERRITORY	NFT QTY	ALLOCATED VALUE
The Kingdom of Solarius	5	\$1.000.000
The Lands of Lunaria	10	\$100.000
The Dominion of Stellaris	100	\$10.000
The Borders of Nebula	1000	\$1.000

Distribution Phase 1 - 2025

TERRITORY	NFT QTY	ALLOCATED VALUE
The Kingdom of Solarius	10	\$1.000.000
The Lands of Lunaria	100	\$100.000
The Dominion of Stellaris	1000	\$10.000
The Borders of Nebula	10.000	\$1.000

Distribution Phase 2 - 2026

TERRITORY	NFT QTY	ALLOCATED VALUE
The Kingdom of Solarius	100	\$1.000.000
The Lands of Lunaria	1000	\$100.000
The Dominion of Stellaris	10.000	\$10.000
The Borders of Nebula	100.000	\$1.000

The Territories of the Blockum DAO Universe

Solarius 1

Solarius 2

Solarius 3

The Kingdom of Solarius - Investment level of 1 million dollars or more: The Kingdom of Solarius is the pulsating heart of innovation and entrepreneurship in the Blockum DAO. This territory, bathed in sunlight, is where the brightest ideas are born and the most promising startups are cultivated.

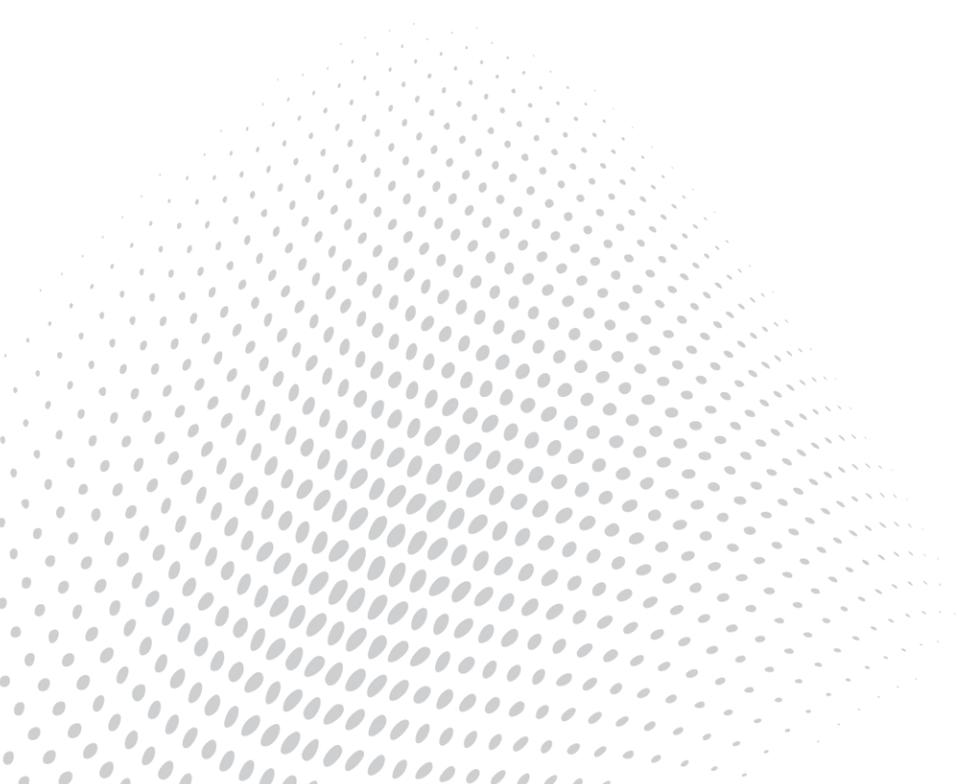

Those who hold NFTs from this kingdom are considered the Sovereigns of Solarius, the visionaries of the Blockum DAO. They are immortalized on the Visionaries Wall on the blockumdao.org website, a testament to their audacity and commitment to innovation.

As Sovereigns of Solarius, they have access to a series of exclusive benefits and privileges. They have free entry to all GoldOfir and Blockum events, including VIP areas, as well as to events sponsored by GoldOfir and Blockum. They also have the opportunity to participate in the Blockum DAO Council, where they can influence strategic decisions and the course of the DAO.

The Territories of the Blockum DAO Universe

*The Kingdom of Solarius is more than just a territory - it's a symbol of leadership and innovation, a place where the leaders of the Blockum DAO community can gather and collaborate to create a better future for all. Those who hold NFTs from this kingdom are not just investors, but also visionaries and leaders, committed to the success and prosperity of the Blockum DAO.

The Sovereigns of Solarius play a crucial role in fostering startups and creating business opportunities. They have the ability to invest in promising projects, guide emerging entrepreneurs, and shape the future of the Blockum economy. In return, they share the profits generated by these initiatives, creating a cycle of shared prosperity.

The Territories of the Blockum DAO Universe

Lunaria 1

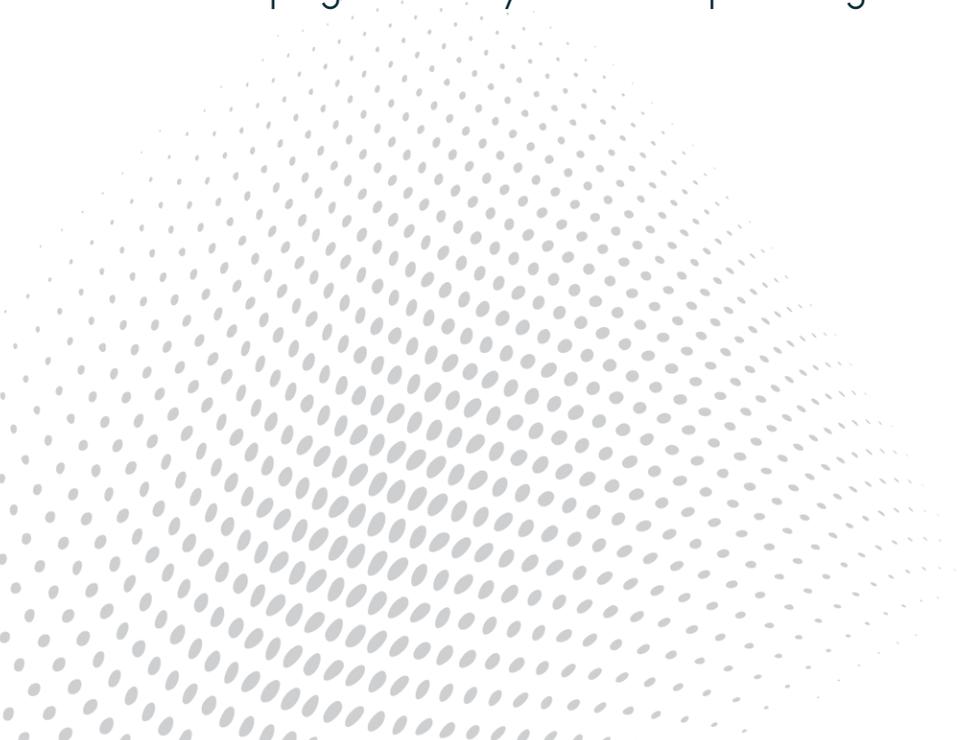

Lunaria 2

Lunaria 3

*The Lands of Lunaria - Passive asset level of 100 thousand dollars or more: The Lands of Lunaria are the silver reflection of Solarius, a place of wisdom and serenity. Those who hold NFTs from this territory are considered the Luminaries of Lunaria, the strategists of the Blockum DAO. They are immortalized on the Strategists Mural on the blockumdao.org website, a testament to their acumen and ability to identify promising business opportunities. As Luminaries of Lunaria, they have the ability to guide the strategic direction of the DAO, helping to identify and foster promising startups.

The Territories of the Blockum DAO Universe

Stellaris 1

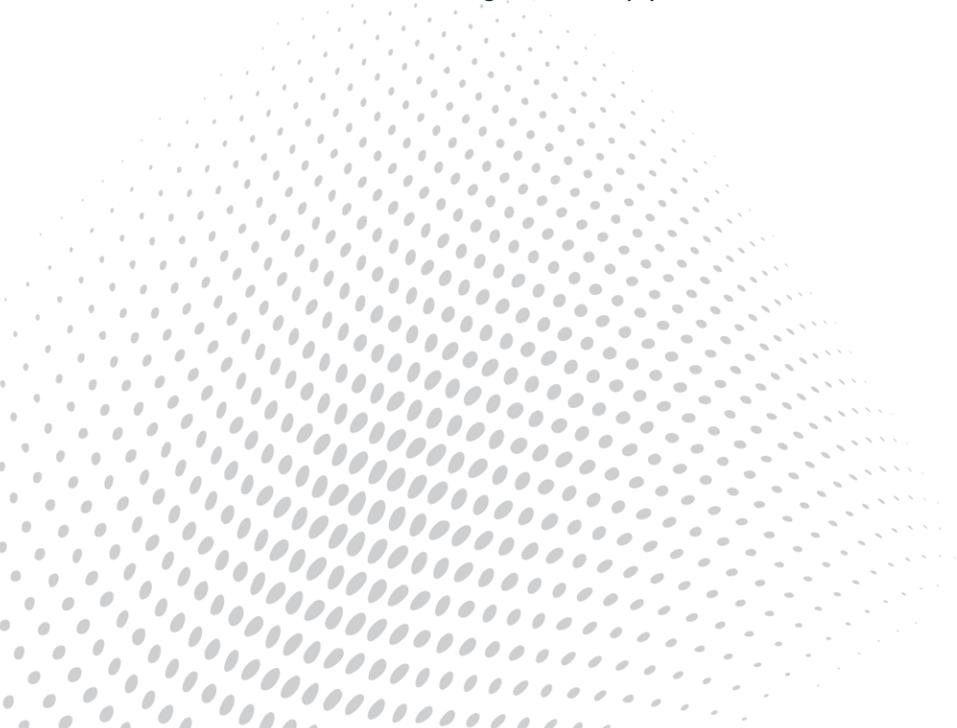

Stellaris 2

Stellaris 3

*The Dominion of Stellaris - Passive asset level of 10 thousand dollars or more: The Dominion of Stellaris is a starry field of opportunities, a place of innovation and discovery. Those who hold NFTs from this dominion are considered the Astronomers of Stellaris, the explorers of the Blockum DAO. They are immortalized on the Explorers Mural on the blockumdao.org website, a testament to their curiosity and desire to discover new business opportunities. As Astronomers of Stellaris, they have the ability to explore the vast metaverse in search of new investment and growth opportunities.

The Territories of the Blockum DAO Universe

Nebula 1

Nebula 2

Nebula 3

*The Borders of Nebula - Passive asset level of 1 thousand dollars or more: The Borders of Nebula are the gateway to the Blockum universe, a place of welcome and inclusion. Those who hold NFTs from this territory are considered the Navigators of Nebula, the ambassadors of the Blockum DAO. They are immortalized on the Ambassadors Mural on the blockumdao.org website, a testament to their dedication to building and maintaining an inclusive and welcoming community. As Navigators of Nebula, they have the ability to welcome new members into the community, helping to cultivate a culture of collaboration and mutual support.

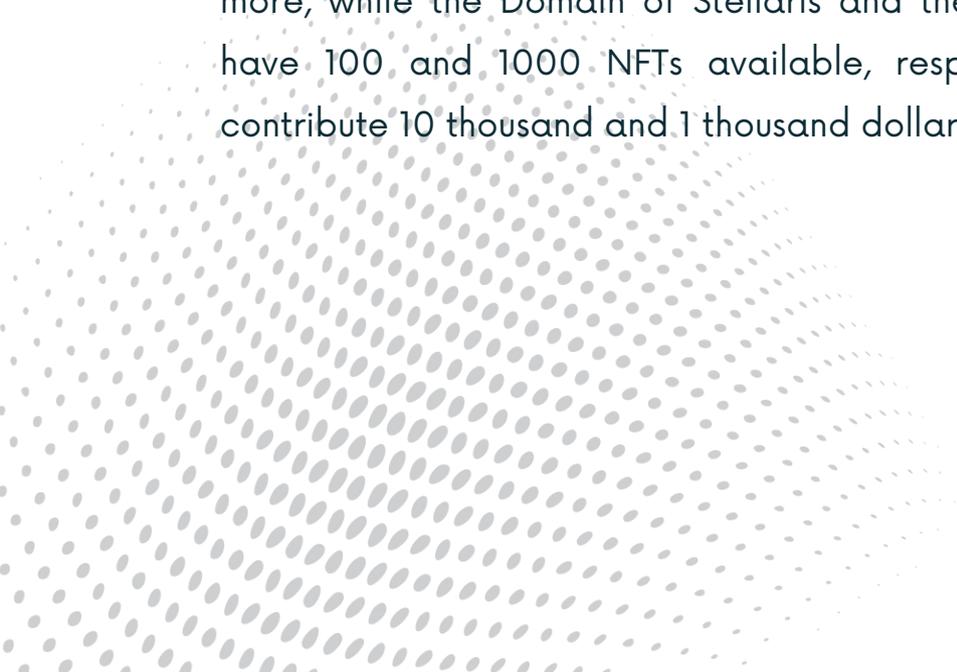

The Territories of the Blockum DAO Universe

Each of these territories represents a level of passive digital wealth achieved and offers corresponding benefits. Moreover, each territory has its own identity and culture, encouraging users to identify with a specific territory and strive to be a part of it. Those participating in the first distribution will have the opportunity to shape the culture and identity of their respective territories, giving them a sense of ownership and belonging.

At Blockum DAO, we believe in rewarding our members for their commitment to building passive digital wealth. That's why we've introduced NFTs - a way to recognize and reward our members for their investment in our liquidity pool.

Each territory has a limited number of NFTs, which are released in different distribution phases. In the first phase, only 5 NFTs will be released for the Kingdom of Solarius, reserved for the first 5 members who contribute 1 million dollars or more. The Lands of Lunaria will have 10 NFTs available for those who contribute 100 thousand dollars or more, while the Domain of Stellaris and the Borders of Nebula will have 100 and 1000 NFTs available, respectively, for those who contribute 10 thousand and 1 thousand dollars.

The Territories of the Blockum DAO Universe

*To be eligible to receive the NFT, members must first stake their LPs (Liquidity Provider tokens) in the Blockum DAO community smart contract. After doing this, they should send an email to support@blockumdao.org with a screenshot of their pool balance and the wallet they used to make the transaction, or request the NFT through the form on the blockumdao.org website.

These NFTs are not just a form of reward, but also a status symbol. By owning an NFT, members demonstrate their commitment to Blockum DAO and earn recognition for their passive digital wealth. They become Sovereigns of Solarius, Luminaries of Lunaria, Astronomers of Stellaris, or Navigators of Nebula, depending on the level of their contribution.

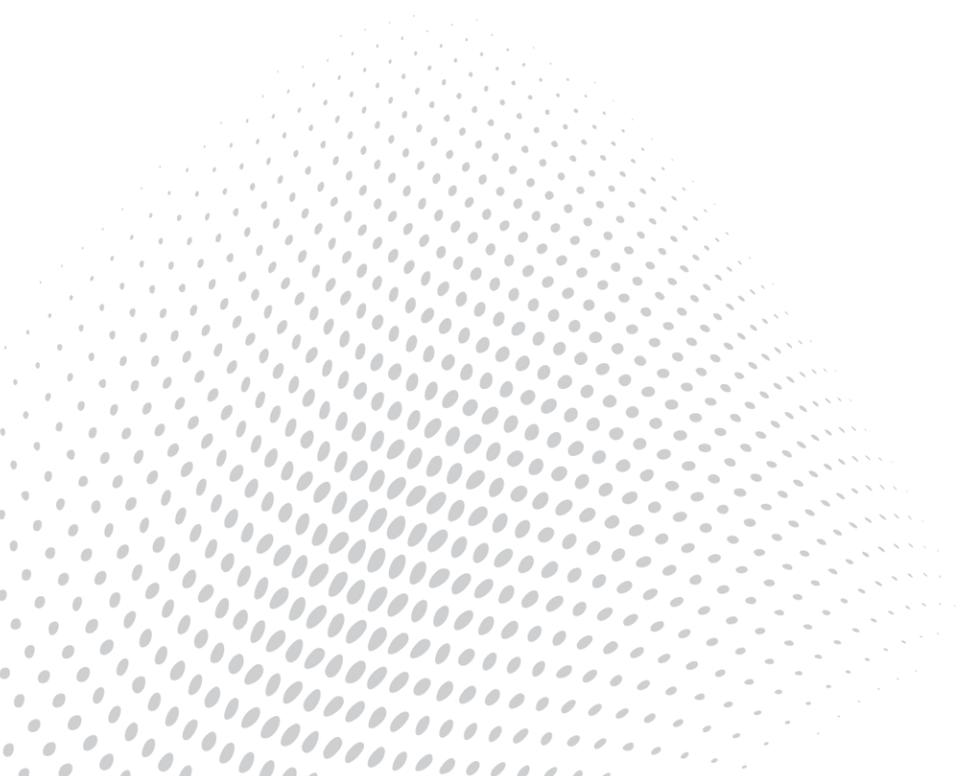

In the second phase of distribution, the number of NFTs available for each territory will increase, allowing more members to join these prestigious ranks. However, those who participate in the first phase of distribution will always have the privilege of being the first members of their respective territories, a testament to their pioneering spirit and vision.

At the end of the three phases of distribution, there could potentially be a total of 123,325 members of the Blockum DAO Founders Club, each contributing to the growth and success of the DAO with their collaboration and vision.

The Territories of the Blockum DAO Universe

It's important to note that if a founding member decides to sell their NFT, the founding member rights will be transferred to the new owner. This means that the status and privileges of a founding member are intrinsically linked to the NFT and not to the individual. In addition, the data on the Members' Mural on the website will also be updated to reflect the new owner of the NFT.

Therefore, if you wish to be part of this exciting universe and build your own digital passive wealth, don't waste time. Contribute to the liquidity pool, request your NFT, and start building your future in Blockum DAO today.
